Take your institution to new heights
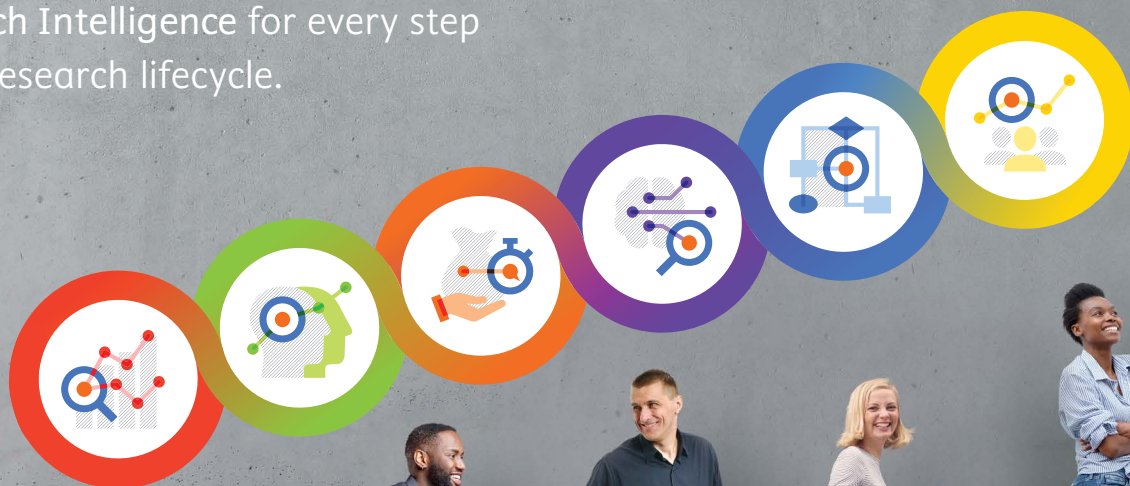

Research Intelligence for every step
of the research lifecycle.

Elsevier's Research Intelligence solutions

Today's research ecosystem is both highly competitive and collaborative. To succeed, you need information that supports strategic decision making so that your research can flourish, advance society and drive economic growth. Elsevier's Research Intelligence solutions, services, data and insights provide research executives with key insights to address critical challenges and expand research excellence.

Research Strategy

Develop and execute an evidence-based, agile research strategy with insightful analyses to inform strategic planning and achieve research goals.

Research Funding

Maximize your funding success by optimizing your team and identifying the most relevant opportunities for targeted funding bids.

Research Management

Make decisions with confidence by optimizing data validation, system integration, and research tracking and administration.

Expertise & Collaboration

Advance your research programs by identifying outstanding researchers and existing and potential cross-sector partners.

Conducting Research

Enhance research efficiency by enabling research discovery and improving workflows.

Impact & Engagement

Enhance your reputation for research excellence and advance open science and scholarship by increasing research interactions and profile visibility.
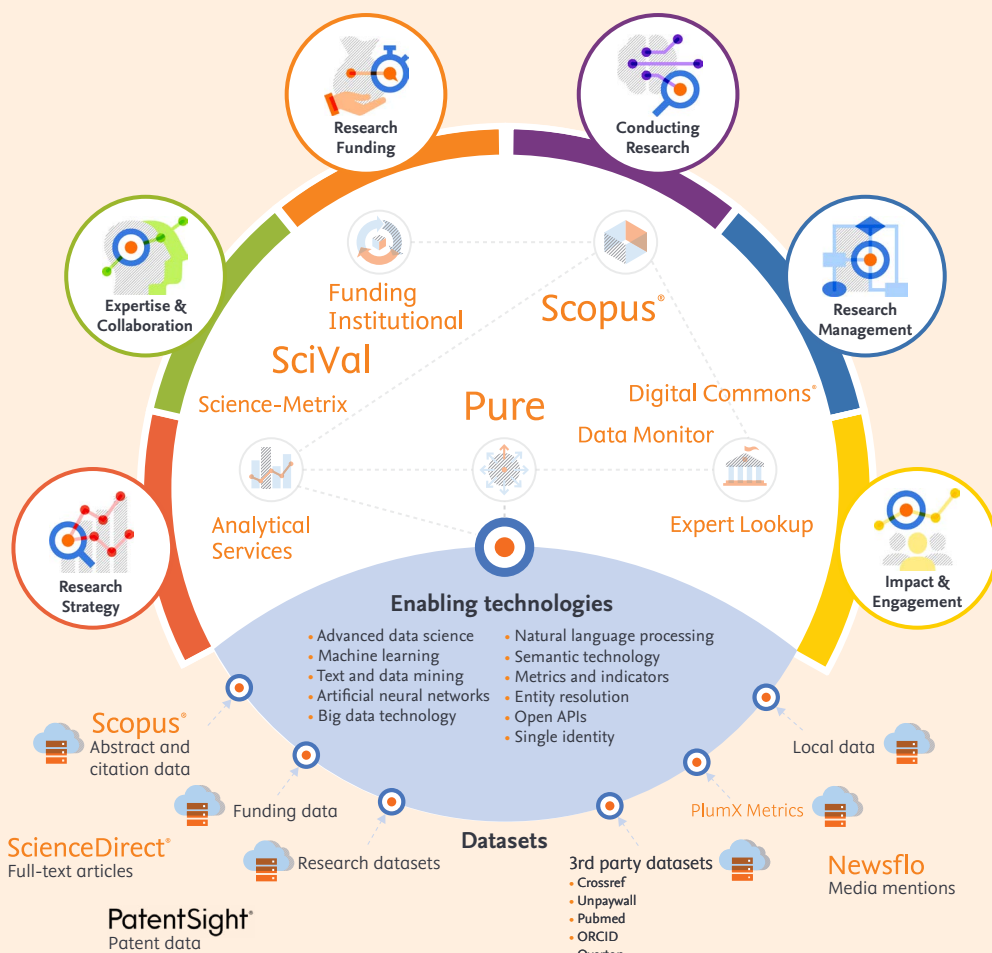

ELSEVIER

Complement your expertise with Elsevier's
Research Intelligence

The portfolio's interoperable, modular solutions and services draw on authoritative, structured, connected data, advanced analytics, and an array of trusted indicators and metrics to empower well-informed decisions, whatever your role in the research enterprise.

Scopus®

An expertly curated abstract and citation database with content from 7,000+ publishers to help track and enhance researcher and institutional data and discover global research in all fields

SciVal

A web-based analytics solution with unparalleled flexibility that provides access to the research performance of over 20,000 academic, industry and government research institutions and their associated researchers, output and metrics

Pure

The world's leading research information management system that enables evidence-based decisions, simplifies research administration and optimizes impact, reporting and compliance

Funding Institutional

A research funding solution with 21,000 active and recurring funding opportunities with information on over 7 million awarded research grants from 5,000+ government and private funders worldwide

Expert Lookup

An online tool that uses the semantic Fingerprint Engine® to identify scientific experts for funding priorities and reviews, and reveal potential conflicts of interest and commitment

Digital Commons®

A cloud-hosted turnkey institutional repository and research data and publishing platform to openly share and track the impact of the full spectrum of research and scholarship produced by your faculty, students and staff

Data Monitor

Data Monitor puts institutions in the driving seat of their research data management journey by providing visibility on their institution's entire research data output

Analytical Services

Research performance consulting services that combine technical and metrics expertise and high-quality data sources to produce custom reports
