ELSEVIER

# Topics

Embedded Topics Pages in articles and book chapters on ScienceDirect provide contextual information, such as defining unfamiliar terms or concepts, to enhance understanding.

## Taxonomy Building

Over 15 taxonomies in different fields have been used to identify the most important concepts to build topic pages.

## Data Mining

We run our taxonomies across all Elsevier's book content and other reference material to identify potential candidates for extraction.

## Quality Confirmation

By collecting feedback from subject matter experts and measuring quality, topic pages are continuously improving.

## Relevancy Ranking

Heuristic techniques are used to rank definitions and snippets to push the most relevant and diverse information to the top.

## Algorithmic Information Extraction

We then use natural language processing algorithms to ensure the right sections of content are being chosen.

# Features

Intuitive tools and features make discovery faster and easier.

- Basic & advanced **SEARCH** make it easy to discover more relevant journal articles and book chapters.
- Setting **ALERTS** ensures the latest research is never missed.
- Our enhanced PDF article **READER** shows outlines, citations, recommendations, in-article references and author links for a richer reading experience.
- **READING** and **SEARCH HISTORY** features keep track of the 100 most recent articles or book chapters viewed.
- **RECOMMENDATIONS** combine reading history with articles peers have read and Scopus citation data to recommend other relevant information.
- **REMOTE ACCESS** lets subscribed publications to be read anytime and from anywhere, without being limited to an IP range.

Search results load in only 2.8 seconds. An article page loads in only 5.2 seconds.
